

Protecting the world from harmful exposures

The Defense Occupational Environmental Health Readiness System – Industrial Hygiene [DOEHRIS-IH] reports occupational and environmental health readiness and actively tracks air, water, soil and environmental hazards for the Department of Defense Military Health System.

Product Features

- Captures and maintains comprehensive, exposure-based medical surveillance information
- Tracks personnel exposure data and protection equipment usage
- Observes workplace practices and provides mobile capability for use in garrison, deployed and theater environments

Benefits to the Military Health System

- Tracks and provides employee health hazard education
- Enhances personnel readiness
- Ensures compliance with occupational health and safety federal laws and directives
